Certainly, General Sickles is catitled to hearing. His honor as a soldier entitles him to To fold his hands, and hold his peace, might be construed into a confession that he had either sbused his powers or fallen short of his duty. To challenge an investigation into his has done nothing which will not bear the light. The President is in a dilctimat. The prospect is not a flattering one. The odium attaching to the Administration from the removal of Motley from tion. That was an act purely sebatrary and tyrannical, and the country is disgriced when an able and faithful public officer is removed, simply because he will not be a time-server, and an echo of a faithless Evernilys. The case of Gen eral Sickles is a parallel one. His services during the war were brilliant, and his personal heroism ansurpassed. His legal ability is of the highest order. None of our military commanders can compare with him in this respect, and none of them have displayed an equal statesmanship in the management of their respective departments We have already the best cyclence of this in th course of his successor, General Canby, who fade liste to modify or improve in the internal polity adopted and put in operation by General hickles. And we have other testimony to this point of the highest character. Governor Orr, of South Cacolina, has written a letter to General Sickles expressing his regret at his removal and

A Job for the Mayor and Common Coun-

A young woman known as Carrie Haie died on Bauday night or yesterday morning in a house of practication over the New York Dining Paloon, at the corner of Spring and Washington acreets. The exclining cause of her death, it is perpetrated has not been definitely accordined, and probably never will be, unless made the subloct of ludicial investigation. The deceased was the wife of a man named Hale, who, about two and a half years ago had a barber shop in the husband, and with an only child, left to depend upon her own exertions for support. From that

expected death.

Such tragic occurrences should furnish their own commentary, and without stopping to dis-ouse this particular affair, we ask if it is not cuss this particular affair, we ask if it is not the superfluity of "new" occasioned doubtless time that the commonly was again purged of by the perusal of one of Beadle's publications these detestable establishments. Here is this and a too heart; supper of "hash."

New York Baloon, operated by one Wakefield,

It is evening, and from "my window's height" mus, and the saloon entrance below always sen

tineled by pimple-nosed blackguards, whose pockets are stuffed with bowies and revolvers. A tineted by puspersure of the pockets are stuffed with bowles and revolvers. A fortnight ngo a girl was taged to this infamous haunt from Mayville by her brother, who represented that she had been decayed here by Wakefield blumelf. Passing down Diamond street we find part of

block between Martin street and the Crittenden House, peopled by a similar class. A few weeks ago there were between twenty and thirty Inmates, but the "persecutions" of the police have driven some of them temporarily away. A couple of "rot-gut bars" are carried on without license, and occasionally a fight occurs. Every alternate month the Mayor authorizes the polic to make a raid upon these houses; the inmates are brought up and fined or released with the injunction to leave town. They go and their places are promptly filled by requisitions upon Petroteum Centre or Pithote, and the "business" goe forward without interruption.

It is the more disgraceful to the authorities that the places which we have designated, and which are the most notorious in the city, are located upon the principal streets, and where la dies and children are unable to pass without personal contact, and, as in some instances, being subjected to insulting remarks from the de-graded occupants of the place If the Mayor and Common Council are unwil-

ling or unable to shut up these flithy abodes upon Spring and Demond streets, the people will do it themselves. Public sentiment will justify any proceeding which may be found necessary for re-lieving the community of such damantic hell-THE CHURCH RUN OH. LANDS .- While every-

body has beard of the wonderful oil producing farms on Pubole and Oil Creeks, there has been during the last two years a large and increasing production from the Church Ran oll lands, tract adjacent to the Tituaville city line, but there fall should get assessed on or before the 27th of has been so little ado made concerning it, that i operators thereabout seem to have been conscious that they had a profty good thing, and the few months past that the public attention in this vicinity has been directed to its growing importance. The territory commonly known as Church Run oll lands, comprises a number derson, and Brown, besides the Atlantic and Great Western Company's truct, which extends from the city line on the North to the farm on of Good Templars of New York was held in from the city line on the North to the farm on Poughkeepsic last week. The report of the upon Church Run, two years ago, gave ample encouragement for more extensive developments fully traced throughout all the adjacent territory above described. On the Weed Farm there are now eight good producing wells, (averaging from thirty to sixty barrels per day,) and with but scarcely an exception their production has gradually increased with their age. A fortnight ago we visited there wells and the neighboring territory where new wells had been projected or commenced. At that time a new well had just been truck and operated for several days, producing fitteen barrels pur day. Yesterday we learned that it had fully donoled its capacity and was still increasing. Immediately adjoining the Weed farm, and within a few rolls of the producing wells is a lot belonging to Homer G. Bates, which has not yet been tested, but which from its pecu liar topography and location gives unmistakeable evidence of being within "the magic of cle." is probably as attractive a piece a piece of terrifory as borders upon the Weed farm, and in the development to become equally celebrated. My Bates has also a tract of six acres adjoining the Brown farm on the north, which he purposes to soll, and which is within a few rods of wells alread in process of sluking. The advertisement of

A MORNON ' BLESSING "-The Descret New has a long account of the dedication of a Mormo: meeting-house in one of the towns in Utah. The proceedings were under the auspices of Brigham Young, but the "dedicatory prayer" was deliv cred by Elder Taylor. The prayer was a very remarkable production. It began at the base of the building and went to the top of the steamle. mentioning every item between these points, and alling for blessings upon each separately:

calling for blessings upon each separately:

"Bless, we pray Thee, the house, in all its parts that is built or rests upon this ground; bless the foundation stones thereof, and all of the stone wall that composes the foundation; together with the lime, the sand and clay of which the mortar is composed that bind it together; bless then the columns, and their bases and caps, that are placed in the foundation, or basement, to support the building. Bless also the bonus, the joists, the columns, the looring, the list, is and all the wood-topk pertaining theoreto, incading the beams unqualifiedly endorsing the General's course in as the only means of enabling the people of columns, the flooring, the lint, I sund all the wood-vork pertaining thereto, including the beams and binders, that compose or sustain the tower. Bless also the plates, the intices and beams that assistant he roof, and all the tice and fastenings thereof; ongether with the sheet the and shingles; the tin, since other sustains used upon the roof of the lower; the hell and its fastenings, and overgithing pertaining thereto. Bless shouthe door frames and its incatalizes, and the doors thereof; over the time that the doors thereof. We ask Thus by sheet the windows, and third frames and cavings; and the small, the gloss and the putty where with this are fastened."

These sie only about half the things specified These are only aroust half the things specified by Elder Taylor. He goes on to too Joses, tath and nails, the paint and variety, the "adobtest of which the upper part of the ballding is bull," and other articles too numerous to menton, as the anctioneers say. This "blessing" is the opposite of the "cursing" which the courch afor time visited upon heretics and preverts.

This kind of advertising does not pay, (it is the only kind that does not, however,) consequently lienand passes his feisure moments in reading Beecher's Norwood " out loud to his wife, play ing with the baby, calling his wife a "little rascal," and imagining that he is happy. None of the club ever thought he would amount to much. William was what A. W. calls an etherial cusstomer. He dooted on music, and with a jewshar; pig pen root, and dreaming of Italy-sunny Italy. At length he left home, and now walks aroun the streets pouring out his entire soul of melody through a ten dollar hand-organ, while a buildhended monkey gobbles up the pennics thrown him by delighted children.

Then there was Augustus—he preferred an active life—one where he could do good to his fellow man or woman. After working nine years he at last invented a "Bed Bug Powder," and now travels through the States selling his Dead Shot for Beil Bugs, Cockrouch Annihilator and hed bugs than any living man, and enjoys a fin-

PETROLEUM EXPORTED FROM PHILADELIPHIA AND NEW YORK - From January 1st to the middle of September, 1867 and 1866 the quantity of petroleum exported from Philadelphia and New York was as follows, to wit:

Total........... 40,911,855 27 192,854 3,712,607 When the oil trade was first developed the only then existing rallroad ontlet from the oil region was to New York where, consequently, the first accommodations were provided for the export of oil to foreign countries. Now, how ever, the facilities provided at Philadelphia for the export of petroleum are superior to those provided at New York; and the percentage of increase exhibited in the shipmonte from Philadel.

phia show that her advantages are operating po tentially in her favor. The great carrier of oil present and prospective, is the Frantzienia Railroad Company, which is 1866, on their main road, from their Pittaburgh and Allegheny junction, earlied 773,623 harrels, and on the Philadelphia and Erle Railroad, operated under losse, 573,125 barrels, making the total quantity moved 1,446,750 barrels. Spiritual Manifestations.

At the National Convention of Spittmalists. which met lately in Cleveland, a report was subsaltted by a committee on against the po-

which caused a great commotion among the beliterer. It is conclusions were as follows:

First-That many of the physical manifestations are the gentine work of spirits, but a fur
greater portion of each has been represented an
auth has been proves to be the deceptive tricks
of impostors, primal off upon the community as
gentiace apirit masifestations. These remarks
are mainly applicible to the dark circle imposters, the Davespriat, Foys, Eddies, Ferrises,
Church, Mias Van Wie, and others who pretent
to do physical laposebilities, cisining that
spirits do them, while they give no proof of what
they assert. After different and careful investigation of the subject the committees say they are
tresistably forced to the conclusion that dark
wess is not a necessary condition for physical
manifestations, butthat it is a condition assumed
and insisted upon by fricksters, having no other
uses than to afford opportunities for deception.

They therefore eccommend that all spiritualists and others discountenance dark circles, for
under any circumstances they afford no reliable
proof of spirit exikonce, presence or communion, and must, evel if they were genaline, be of
such doubtful chancter as to be of no practical
value, while there we thousands of incontestable
proofs that admit if no doubt of other solution
than the one to when they are preferred.

The Committee isso declare that the habitual
ferrors of the medium appear in communications
from spirits. The knowness of mediums charactures their stagements when "under influters," Daniel Webster" returns to earth to
or spirits and have lived in such or such a
locality, and that their friends reside there now,

correct initiatance in his dictionaries. Scores of "spirits" claim in have lived in such or such a locality, and that their friends reside there now, when no such persons are, or ever have been there, and many place similar discrepancies. The prejudice of acdiums for or against any reculinr view, colors their speech. Houry Clay is anti-slavery or pro-slavery, according to his medium; Mr. Linohi, through in Tevan robel, deplores the part is played in "wronging" the Southern people, and announces himself in agony for his misdedds, Very often the desires of persons seeking qualunations, distort, into historia statument and lead to huge
